Abrasion Resistance	ASTM-C1027	4

INSTALLATION

Thickness	Grout Joint Recommendation	Shade Variation
1/8"	1/16" Approximately	 Random (V4)

NOTES

Paper-face and mesh-mounted installation instructions are included in carton.

Strong random shading enhances the beauty of this product. To achieve optimal results, tile should be selected from multiple cartons and shading arrangement planned prior to installation.

Since there are variations in all fired ceramic products, the tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual tiles and trim and not from tile and trim samples or color reproductions. Manufactured in accordance with ANSI A137.1 standards.

Water, oil, grease etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.
