

Female CELEBRATION

FEMALE CELEBRATION

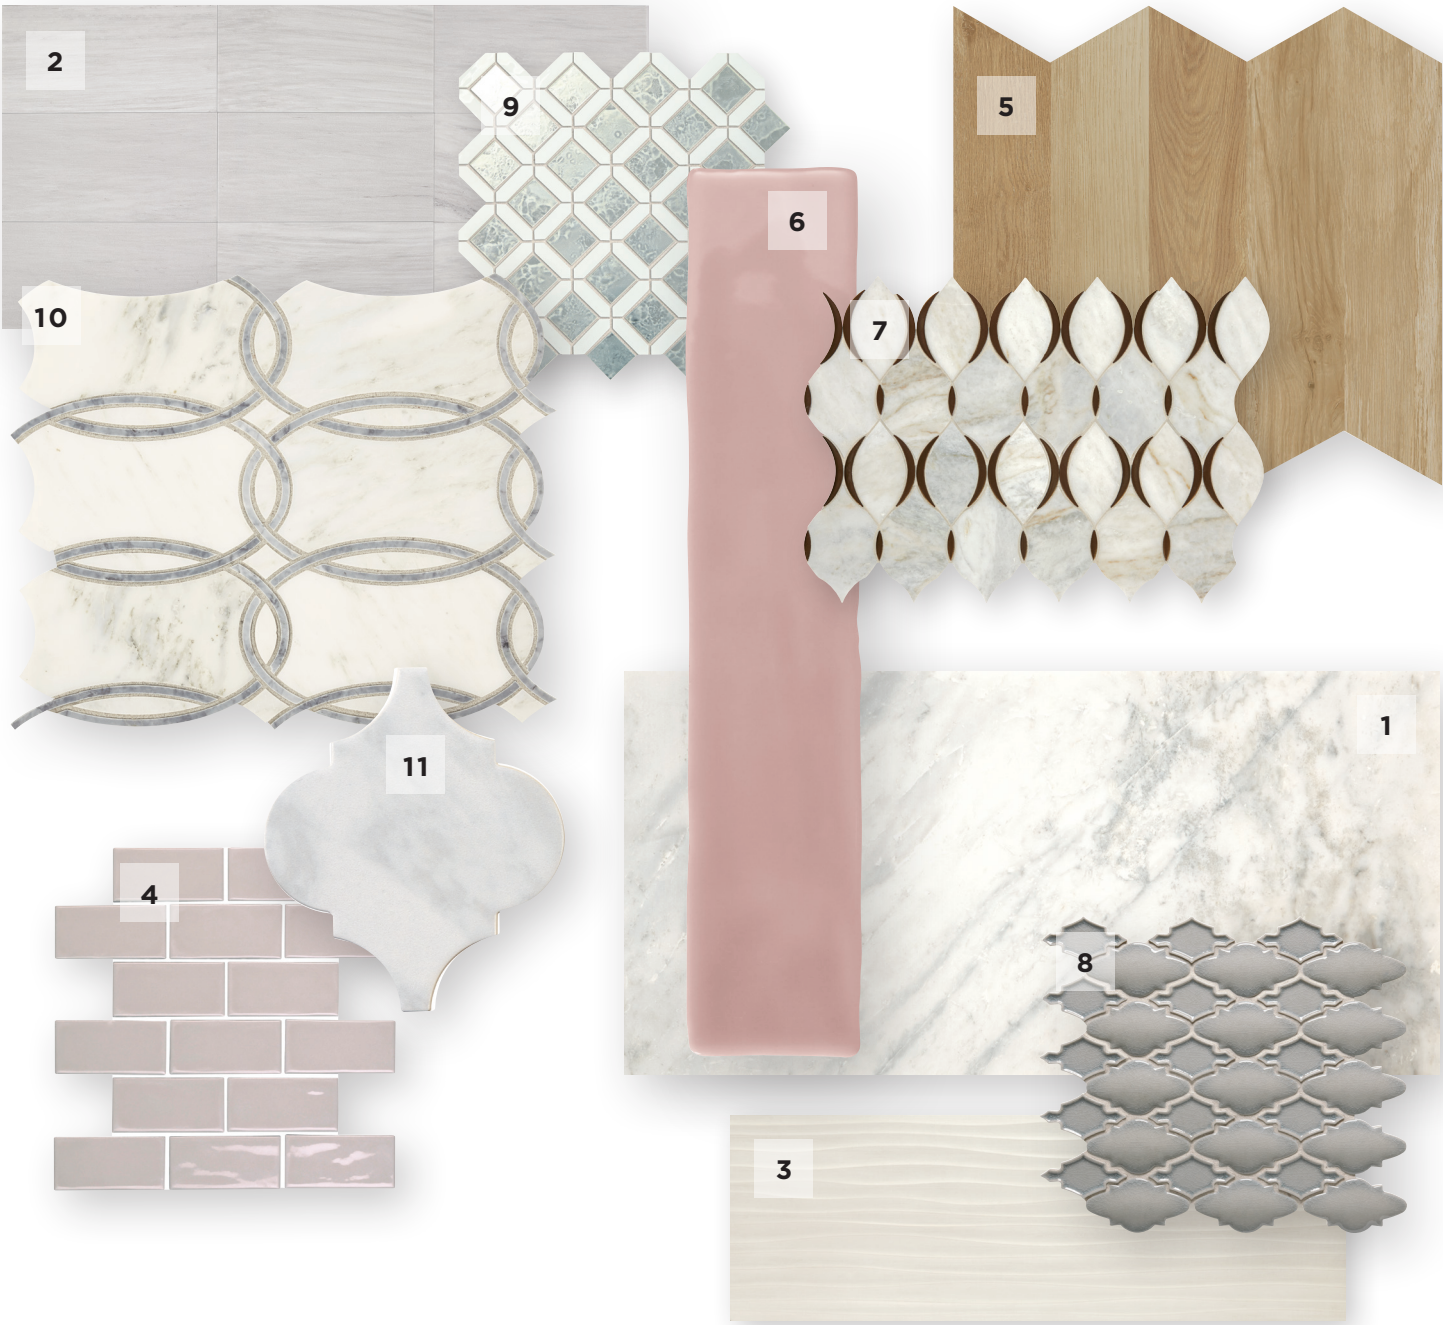

Female Celebration is about reviving feminine archetypes to highlight historically feminine values such as care, flexibility, community, collaboration and empathy. “Softer, more feminine design is the future” says legendary architect Kengo Kuma.

The trend of Female Celebration aims to create reassuring environments where people can truly feel safe, understood and where they can rejuvenate. Interiors following this trend promote a new gentleness, harnessing calming aesthetics, therapeutic colors, soothing textures and round and reassuring shapes. Soft, round and other organic shapes inspired by the delicate beauty found in flowers and handmade crafts like Origami are main features of this trend.

Another important aspect of this trend is how something gracious, delicate and fine can also shine with the strength inherent in the female spirit.
