MARAZZI 
DARE TO BE BOLD™

URBAN DISTRICT COLLECTION

Marazzi's Urban District™ collection is an eclectic blend of products that complement an industrial design style influenced by the revitalization of downtown warehouse districts. Industrial design reveals the ageless character of a space by exposing raw building materials and using them as the foundation to create functional upscale interiors. With this concept in mind, Urban District was born. Thoughtfully designed and authentic in look, Urban District's signature products include BRX (brick-look), STX (wood-look) and HEX (hexagon-shaped). This unique combination of textures and colors adds bold character to any design style.

URBAN DISTRICT BRX

Urban District BRX™ [bricks] is influenced by the hand-crafted shapes and highly variegated color expanses of nineteenth century Chicago brick heritage. Reclaimed. Revitalized. Remarkable. This bold new take on traditional brick uses modern ceramic technology to recreate the characteristics of artisanal masonry in a slim profile with a wide range of color-blends. BRX 2"x8" and 4"x8" modules easily accommodate basket weave, herringbone, stack and running bond patterns in industrial, contemporary or traditional design settings.

URBAN DISTRICT STX

Urban District STX™ [sticks] is an industrial-inspired wood-look tile ideal for transforming modern spaces. Four lightly distressed monochromatic color ranges in 6"x36" planks incorporate the natural knots and whorls inherent to wood and artlessly mix with design elements of glass, stone, fabric and metal. Lightly wire-brushed surfaces and defined grain lines achieved through 3d imaging technology bring depth and a sense of movement to any interior.

URBAN DISTRICT HEX

Urban District HEX™ [hexagon] has its basis in the maker movement of hand-crafted, traditional artisan shapes and finishes. This large-format 16" hexagon porcelain dramatically challenges preconceived ideas of space interpretation. Not square, not rectangular, the shape immediately piques the curiosity and redirects conventional mindsets. State-of-the-art digital imaging combines with a gently undulated, hand-scraped surface treatment and rustic chiseled edges to realistically replicate a time-worn paver. Six organic color ranges genuinely display unevenly worn gloss areas with a slight sheen to create a striking design statement.
